#### **ANALYTICS DASHBOARDS**

Our Real-World Data engine allows Biopharma companies to harness unique data and actionable insights to grow revenue.

# The patient journey, reimagined

#### PATIENT JOURNEY

SYMPTOM MANAGEMENT DOSE

#### **Quality of life tracking**

Measure patient progress Ensure optimal drug with tools like connected wearables and devices and patient diaries

MANAGEMENT

#### Dose Optimization

dosing and titration through early detection of missed doses or overdosing to enable early provider intervention

**ADHERENCE +** PERSISTENCE

#### **Patient adherence**

Unlock better patient adherence and persistence with innovative digital drug companions apps, dosing algorithms and SaMD

#### **Real-world data**

DATA +

**OUTCOMES** 

Gain patient insights to increase adoption and engagement, and demonstrate therapy value to payers with clinical outcomes

### Accelerate time to market

#### Configurable, flexible functionality

Even a month's delay bringing a digital solution to market could mean leaving millions of dollars on the table

- Work with a proven SaMD partner
- Scale across brands, therapy areas and geographies
- Support the highest regulated digital health SaMD classifications
- Configure Solution to meet your specific needs

## **Engage patients to** improve outcomes

#### **Comprehensive patient**centered tools

Research shows that a 10% increase in adherence translates to a \$124 billion pharmaceutical revenue opportunity globally<sup>1</sup>

- Drive adherence and persistence with algorithms
- Measure progress on qualityof-life metrics
- Streamline medication management
- Inform patient-clinician discussions

### Harness unique data to grow revenue

#### **Real-World Data engine** with actionable insights

Unique patient-level data has been historically impossible or costly for biopharma companies to acquire

- Optimize patient adoption and engagement
- Demonstrate therapy value to payers
- Support clinical decision-making through compliant algorithm hosting
- Satisfy the highest security and privacy requirements
